Headline

Portfolio closed at \$1,541,047, up \$17,916 on the day.

Top Movers

- **BHP** \$60.56 (+3.2%, +\$20,470): the dominant contributor; extends a rebound from the 9 Jul low of \$56.87, and holdings were topped up to 11,065 units.
- **CSL** \$121.75 (-1.0%, -\$4,175): pullback consistent with softening from the 9 Jul peak of \$125.53, though position was also increased to 3,450 units.
- **AMP** \$1.73 (+2.1%, +\$2,450): fresh high for the window, extending a steady four-day uptrend.
- **ALK** \$1.39 (-1.1%, -\$2,298): drift lower within a \$1.35–\$1.45 range; no clear direction.
- **ASM** \$1.135 (+2.7%, +\$1,724): bounce back to the middle of a choppy range.

Trend Notes

- **AMP** has climbed for five consecutive sessions from \$1.645 to \$1.73, breaking the top of its early-window range.
- **PTR** remains in a downtrend, closing \$0.085 vs \$0.097 at window start, with intermittent lower lows.
- **CAN** and **ERA** printed identical closes every session — zero-volume stalls at \$0.004 and \$0.002 respectively.
- **BHP** completed a V-shaped recovery, moving from \$59.57 to a low of \$56.87 and back up to \$60.56.

Risks / Watch

- Heavy concentration in **BHP** (~\$670k, 43% of portfolio) and **CSL** (~\$420k, 27%); combined they drive most daily P&L swings.
- **CBA** (unheld) advanced from \$161.14 to \$170.00 over the window — a sizeable watchlist move missed.
- Micro-cap tail (**CAN**, **ERA**, **VML**, **PTR**) is illiquid or drifting lower; combined value under \$3k contributes noise but no meaningful upside.
